Developing test methods for ultrathin hydroxyapatite coatings

GOTHENBURG, NOVEMBER 02, 2018

Promimic will be present at the ASTM workshop on coatings for the Medical Device industry in Washington on the 6th of November. Per Kjellin, one of the founders of Promimic, will talk about techniques to characterize ultrathin implant surface coatings, and how these relate to existing ASTM standards.

About

Promimic, based in Gothenburg, Sweden, develops and markets products within nano-materials for innovative surface treatments. Promimic has developed the HAnano Surface that speeds up and improves the anchoring of implants in bone. The innovative HAnano Surface is licensed to several dental and orthopaedic implant companies. www.promimic.com
